TECHNICAL SKILLS

- **Generative AI & AI/ML:** Large Language Models (GPT-4/4o, Azure OpenAI), Agentic AI, Retrieval-Augmented Generation (RAG), Model Context Protocol(MCP), LangChain, LangGraph, Prompt Engineering.
- **AI Productivity & Enterprise AI Tools:** Microsoft Copilot, Google Gemini, Claude AI, Atlassian Roovo AI, BigPanda Biggy AI, Cursor AI.
- **Site Reliability Engineering (SRE):** Incident Management, Problem Management, Root Cause Analysis (RCA), Service Restoration, Production Support, SRE Practices, SLA/SLO Monitoring, Change & Release Support.
- **Observability & Monitoring:** Dynatrace, Splunk, GlassBox, Dashboard Development, Alerting, Log Analysis, Application Observability, Production Health Monitoring.
- **Cloud & Platform Engineering:** AWS, Kubernetes, Docker, Harness CI/CD Pipelines, SSO Integration, DNS Configuration, NoSQL Databases (Couchbase, Couchbase Capella, Amazon DocumentDB).
- **Programming & Query Languages:** Python, Java Spring, SQL, DAX, DQL, DPL.
- **Automation & Analytics:** Power Automate, Power BI.
- **DevOps & Collaboration:** Git, Jira, ServiceNow, Confluence, Agile Scrum, Sprint Planning, Release Coordination.
- **Development & Testing Tools:** Visual Studio Code, IntelliJ IDEA, SQL Developer, PuTTY, Postman, SoapUI.
- **Integration Technologies:** APIs, Microservices, Kafka, Message Queues (MQ).
- **Domain Expertise:** Hospitality Industry, Reservations, Revenue Management, Data Integration, Sales.
- **Leadership:** Technical Leadership, Solution Architecture, Client Engagement, Cross-functional Collaboration, Team Mentoring, Agile Delivery, Innovation Management, Technical Reviews, GenAI POCs & Client Demonstrations.

RAGAVAN DURAIRAJ

SRE and GenAI Innovation Lead

Innovation-driven SRE and Generative AI Leader with 7+ years of experience in site reliability, production support engineering, AI/ML innovation, and enterprise solution delivery. Skilled in leveraging LLMs, Agentic AI, RAG architectures, and intelligent automation to drive business value through scalable, reliable, and impactful technology solutions.

WORK EXPERIENCE

Client: Leading Hospitality Client in US

Working as a **Technical Lead, Site Reliability Engineer (SRE), and Generative AI Innovation Lead** at Tata Consultancy Services with **7+ years of experience** in production support, incident management, cloud-native applications, and platform reliability. Possess strong **domain expertise in the Hospitality industry, particularly in Central Reservation Systems (CRS)**, with extensive experience supporting mission-critical reservation platforms and cross-functional business operations. Experienced in designing and delivering enterprise **Generative AI** solutions using **LLMs, RAG, MCP and Agentic AI** technologies. Strong expertise in **observability, automation, RCA, Dynatrace, Splunk, AWS, Kubernetes, and DevOps**, driving high availability and operational excellence. Proven ability to lead cross-functional teams, architect scalable solutions, and deliver secure, reliable, and business-focused enterprise platforms.

Technical Lead – Application Development

Jul 2025 – May 2026

Tata Consultancy Services, Chennai

Led the design, architecture, and delivery of a cloud-native Reservation Migration Platform for enterprise hospitality systems, driving end-to-end solution implementation from proposal through production deployment.

Key Responsibilities

- Designed the AWS-based solution architecture and prepared the complete technical proposal for client approval.
- Led client workshops, requirement gathering sessions, and technical discussions throughout the project lifecycle.
- Collaborated with platform, security, infrastructure, and networking teams to enable DNS, SSO, environments, APIs, and cloud services.
- Coordinated Agile sprint planning and successfully delivered all committed sprint deliverables on schedule.
- Worked closely with development, DevOps, QA, and business teams during deployment and production readiness.
- Received client appreciation for technical leadership, delivery excellence, and solution ownership.

Key Achievements

- Designed and implemented a cloud-native Reservation Migration Platform using AWS microservices architecture.
- Automated reservation migration through secure SFTP ingestion, cloud processing pipelines, business-rule validation, and API-based migration workflows.
- Improved partner onboarding timelines by **40%** through standardized migration automation.
- Reduced manual migration effort by **70%** using configurable mapping and validation engines.
- Achieved **95%+ data accuracy** through automated validation and intelligent normalization.
- Reduced issue detection and resolution time by **50%** using real-time monitoring dashboards.
- Enabled flexible partner-specific configurations through dynamic mapping frameworks.

CERTIFICATIONS

AWS Certified Solutions Architect – Associate

Jun – 2025 to Jun – 2028

AWS - 7d71d744f3ef4837ad1be817f00ee860

AWS Certified AI Practitioner

Feb – 2025 to Feb – 2028

AWS - 2dec7f3f3fb2474e87e0d32cfc15e85a

Tableau Desktop Specialist certificate

Mar – 2024

Tableau – T000141370

Python for Data Science Professional

Jan – 2024

Edureka - KNH97F982

Certified Entry-Level Python Programmer

Nov - 2023

PYTHON INSTITUTE - nQ7X.34wN.09eK

Microsoft Certified Azure Fundamentals

May – 2021

Microsoft - H780- 1500

EDUCATION

Master of Business Administration in Technology Management (MBA)

Distance Education, Anna University at Chennai, TN, IN. May 2021 - June 2023

Bachelor of Engineering (B.E) in Electrical and Electronics Engineering

K Ramakrishnan college of Technology at Trichy, TN, IN. July 2015 - April 2019

Secretary of Muththamizh Mandram in my college | Vice Chairman of IEEE Students Chapter of my college | Coordinator for most the Symposiums & Workshops in my college | Head of Compering Club of my college

Techno-Functional Lead (Incident Management) Apr 2022–Jun 2025 Tata Consultancy Services, Chennai

Led production support operations for enterprise reservation platforms while managing high-priority incidents, driving observability improvements, automation initiatives, and cross-functional technical leadership.

Key Responsibilities

- Led bridge calls for Severity 1 and Severity 2 production incidents involving multiple technology teams.
- Managed end-to-end incident lifecycle including triage, communication, restoration, RCA, and preventive actions.
- Collaborated with Revenue Management, Sales, Data, Infrastructure, Development, and Business teams to resolve production issues.
- Improved production observability using Splunk and Dynatrace dashboards, alerts, and monitoring strategies.
- Developed operational dashboards using Power BI for production analytics and KPI reporting.
- Automated incident notification workflows using Microsoft Power Automate.
- Mentored engineers and standardized production support processes.

Key Achievements

- Delivered **99.9% application availability** through proactive monitoring and incident management.
- Reduced **MTTR by 40%** through enhanced observability using Dynatrace and Splunk.
- Reduced **MTTA** by automating critical incident notifications using Microsoft Power Automate.
- Reduced L3 ITASK escalations by **50%** through deeper L2 troubleshooting and RCA.
- Led critical revenue-impacting incident war rooms with successful service restoration.
- Supported enterprise migration from Slack monitoring to Dynatrace observability platform.

Incident Management Specialist

Jul 2019 - Mar 2022

Tata Consultancy Services, Chennai

Provided Level-2 production support for enterprise reservation platforms, ensuring high system availability through rapid incident response and cross-functional collaboration.

Key Responsibilities

- Managed high-priority production incidents affecting reservation systems.
- Performed application troubleshooting, log analysis, and issue resolution within SLA.
- Coordinated with development, infrastructure, database, and business teams for service restoration.
- Monitored production environments and proactively addressed operational risks.
- Documented incident resolutions, SOPs, and knowledge articles.
- Trained new associates on production support processes and incident handling.

Key Achievements

- Achieved **100% SLA compliance** for incident resolution and service restoration.
- Successfully resolved revenue-impacting production issues with minimal customer impact.
- Improved operational consistency through documentation and knowledge transfer.
- Enhanced production stability by identifying recurring issues and driving permanent fixes.

AWARDS

- Best Team Award – Jun 2025 TCS
- Star of the Quarter Award – Apr 2025, Nov 2025 TCS
- Applause for Team Award- Dec 2024 TCS
- Star Performer of TTH Americas (Unit Level) – Oct 2024 TCS
- Service & Commitment Award - Jul 2024 TCS
- Certificate of Recognition – Alumni Service Award – Mar 2024, Apr 2025
- K Ramakrishnan college of Technology at Trichy
- Certificate of Appreciation - Sept 2023 TCS
- Beyond Excellence Award - Aug 2023
- TCS-Customer
- Applause for Team Award - Apr 2023 TCS
- Technical Excellence Award - Apr 2023
- TCS-Customer
- On The Spot Award - Nov 2022, Jan 2021, Jan 2025 TCS
- Gold and Silver Certificate by Corporate Maitree - Apr 2022 and May 2021 TCS
- Special Initiative Award - Jan 2022, Jan 2025, Aug 2025, Dec 2025, Jul 2026 TCS
- P4L Appreciation Certificate - Jul 2021 TCS

Generative AI Innovation Lead (Parallel Role)

Tata Consultancy Services, Chennai

Jun 2023 - Present

Leading enterprise Generative AI initiatives alongside SRE responsibilities by designing secure, scalable AI platforms and intelligent automation solutions for hospitality operations.

Key Responsibilities

- Designed and delivered enterprise GenAI solutions using Azure OpenAI, OpenAI, and Agentic AI frameworks.
- Built Retrieval-Augmented Generation (RAG) applications, AI assistants, synthetic data generation platforms, and AI automation solutions.
- Developed reusable AI accelerators, frameworks, and enterprise integration patterns.
- Led technical architecture, client demonstrations, solution reviews, and innovation workshops.
- Collaborated with architects, business stakeholders, and engineering teams to deliver production-ready AI platforms.
- Ensured AI platform reliability through monitoring, incident management, observability, and operational excellence.

Key Achievements

- Led multiple enterprise AI Proof of Concepts (POCs) from ideation to production.
- Built scalable AI solutions integrating OpenAI, Azure OpenAI, Vertex AI, LangChain, LangGraph, and AWS services.
- Improved developer productivity through reusable AI frameworks and automation accelerators.
- Successfully managed cross-functional AI innovation teams and client engagements.
- Established best practices for secure AI deployment, monitoring, governance, and operational support.

PROOF OF CONCEPTS (POC'S) PROJECTS & KEY ACHIEVEMENTS

1. Pricing Application Chatbot

Technologies: Azure OpenAI, LangChain, RAG, Python, Vector Database

- Developed an AI-powered chatbot for pricing application to provide conversational support.
- Built a Retrieval-Augmented Generation (RAG) knowledge base using pricing documentation, FAQs, and support artifacts.
- Automated extraction, summarization, and structuring of pricing knowledge for accurate responses.
- Enabled dynamic knowledge base updates and improved user self-service experience.

2. GenAI-Based Test Case Scenario Generation

Technologies: Azure OpenAI, Python, Large Language Models (LLMs)

- Developed an LLM-powered solution to automatically generate reservation test case scenarios.
- Generated comprehensive functional test scenarios based on key reservation parameters and business rules.
- Improved test coverage while significantly reducing manual test design effort.
- Enabled standardized scenario generation for enterprise QA teams.

ACCOMPLISHMENTS

- **Information Security Leadership:**
Coordinated security incidents and drove awareness through training, boosting security compliance (2020-2024).
- **Learning & Development:** Led initiatives to improve team skills through structured training and development programs.
- **Project Proposal Expertise:**
Developed and delivered successful project proposals in Microsoft PowerPoint, contributing to successful project acquisitions and client engagement.
- **Initiated Project Activities:**
Spearheaded initiatives to improve team collaboration and project performance.

3. Synthetic Test Data Generation with GenAI & TOSCA

Technologies: Azure OpenAI, Python, TOSCA, Automation

- Developed a Generative AI solution to automatically create realistic synthetic reservation test data.
- Integrated generated test data with the TOSCA automation framework for reservation creation.
- Reduced manual test data preparation while improving testing quality and coverage.
- Accelerated automated testing for enterprise reservation applications.

4. KT Video to Technical Documentation Generator

Technologies: Azure OpenAI, Whisper, Python, OCR, LangChain, Vector Database, RAG

- Developed an AI-powered solution that converts Knowledge Transfer (KT) videos into structured technical documentation.
- Automated speech-to-text transcription, content summarization, and document generation from recorded training sessions.
- Enabled semantic search and conversational Q&A over generated documentation using RAG and LLMs.
- Reduced manual documentation effort and accelerated onboarding for support and engineering teams.

5. AI-Powered Source Code Documentation & Code Assistant

Technologies: Python, Azure OpenAI, LangChain, RAG, Vector Database

- Built an intelligent code documentation platform that automatically generates technical documentation from source code.
- Enabled developers to interact with generated documentation using an AI-powered chat interface.
- Improved code understanding, maintainability, and developer productivity through contextual code explanations.
- Supported documentation generation across multiple programming languages and project modules.

6. GenAI-Powered Exploratory Data Analysis (EDA) Platform

Technologies: Python, Pandas, Plotly, Streamlit, OpenAI, LangChain

- Developed an AI-driven Exploratory Data Analysis platform for structured and unstructured datasets.
- Automated data profiling, visualization, statistical analysis, anomaly detection, and insight generation.
- Enabled users to interact with datasets using natural language queries and receive AI-generated business insights.
- Generated dynamic reports, charts, and recommendations for faster decision-making.

7. AI-Powered Group Sales Booking Assistant

Technologies: Python, Azure OpenAI, LangChain, REST APIs, Email Automation

- Developed a conversational AI solution to automate hotel group booking requests received via email.
- Extracted booking information such as guest count, travel dates and hotel locations using LLMs.
- Automatically identified missing booking details and generated contextual follow-up emails until all mandatory information was collected.
- Converted finalized booking requests into structured JSON payloads for downstream reservation processing.
- Reduced manual effort and improved response time for hotel group sales operations.

INTERNAL KEY CERTIFICATIONS IN TCS

- Software Security Awareness for Managers - Module 1 & 2 - 12-Nov-2025
- GenAI : AWS Generative AI Series Learning - 30-Jul-2025
- AI Experience Zone for Google Intermediate Curriculum – 04-Dec-2024
- Solution Xpert_AIML_E2_Stream 2 Curriculum – 12-Aug-2024
- Digital: Python for Data Science – 26-Dec-2023
- Digital: Natural Language Processing – 25-Dec-2023
- Foundation Generative AI – 21-Dec-2023
- Leadership: Managing Secure Delivery & Operations – 27-Oct-2023
- Generative AI Foundation Curriculum – 14-Oct-2023
- Business English Certification - 15-Sep-2022
- MFDMTM AI Aware Certification - 24-Mar-2020
- ITIL Foundation Certification - 13-Sep-2019

8. Alexa-Based Hotel Food Ordering Assistant

Technologies: Amazon Alexa Skills Kit (ASK), AWS Lambda, Python, REST APIs

- Designed and developed a voice-enabled food ordering assistant using Amazon Alexa.
- Enabled hotel guests to place food orders using natural voice conversations.
- Integrated Alexa Skill with hotel restaurant ordering systems through secure APIs.
- Automated order capture, confirmation, and order status updates, enhancing guest experience.

9. AI Test Step Generation Copilot

Technologies: Azure OpenAI, LangChain, Python, RAG

- Built an AI-powered testing assistant to generate detailed test steps from high-level test summaries.
- Leveraged certified historical test cases and RAG to recommend standardized test procedures.
- Automatically classified test cases by business functionality (Create, Modify, Delete, Search, etc.).
- Improved test design consistency, reduced manual effort, and accelerated QA documentation.
